CONICAL STRAINER

Conical Strainers :

Type : Conical Strainers.

Application : For trapping foreign particles in the pipe line to be used as temporary strainers during start up and Trail runs. Used as resin traps also.

Construction : Stainless Steel (SS 304 & SS 316)

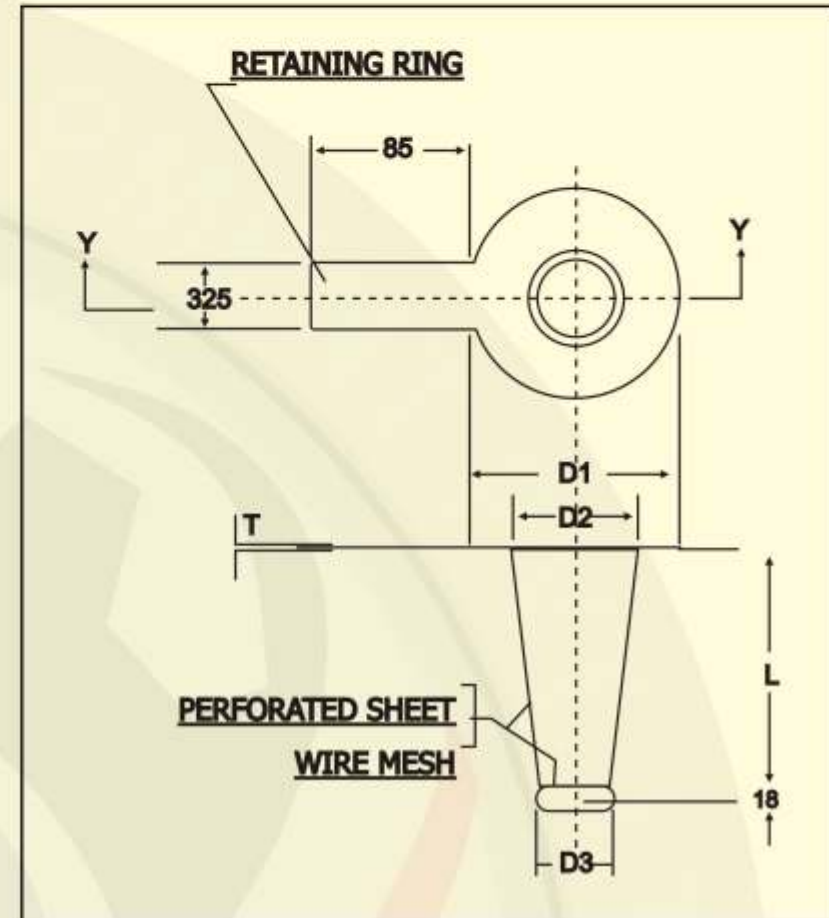

Connections : Suitable for mounting in between Flanges of pipe joints.

Range : Sizes from NB 20 onwards. Flanges suitable for mounting in DIN or ASA Flanges. Micro rating as per customers requirement.

Special Features : Very convenient to move. Made out of perforated sheet and with mesh lining.
